DESIGNED IN EUROPE & MADE IN GERMANY

iD Inspiration has been created by our designers in Europe, drawing on the latest consumer experience trends as explored in the Tarkett's Observer design study. With production expertise in Germany, we can ensure flexible manufacturing, a top quality product and a highly reactive customer service.

A LIFETIME OF SUSTAINABLE FLOORING

iD Inspiration is made to exacting environmental standards - to minimise impact on the environment. With VOC emissions below quantifiable level, it contributes to an optimal indoor air quality. This 100% recyclable flooring is made of 37% recycled material. Also, a unique surface treatment means it needs fewer resources for cleaning for a better environmental footprint and excellent lifecycle cost.

4 DESIGN CONCEPTS TO MATCH TODAY'S TRENDS

LUXURY compose a warm and rich ambiance

The startling mix of iridescent aluminium, gold and bronze with a wood pattern gives the most creative spaces a sumptuous and eye-catching twist.

You can choose between two unique designs, either linear graphical or elegant oak, both available in plank format with bevelled edges.

SCANDINAVIAN sophisticated harmony

Delicate metallic beige and grey are simple and timeless hues that create a sophisticated result for elegant retail and hospitality environments. In a plank format, with bevelled edges, these two tones associate the refined shimmer of metal with an enduring wood design, creating an original look that varies as you move around the room.

NEUTRAL create a subtle, contemporary and graphic style

Start with three stylish and contrasting shades of grey in plank formats, with bevelled edges.

Add in the surprising mix of a delicate stone design with wood embossing. All together, they make a visual ensemble, like a tribute to contemporary art.

DECOSTEEL revisit the industrial look with a touch of elegance

Associating a delicate mother of pearl effect with an industrial pattern brings an astonishingly luxurious shimmer to flooring tiles.

The iridescence makes the color change as you move and creates the most surprising effects.
